

---

## CSS (cont.)

### **Cascading Style Sheets (CSS)**

- **Control Text properties**

Specific fonts and font sizes; bold, italics, underlining, and text shadows; text color and background color; link color and link underlining; etc.

- **Control Format & Position of Block-level Elements**

Set margins and borders for block-level elements; position them in a specific location; add background color; float text around them; etc.

- **Liquid layouts:** expand/contract based on Browser width.

- **Easy** to apply **Same Layout** to **Whole Site** and only need to **modify external CSS file**.

- **Minus:** Not all browsers support CSS the same way.
